

Additional roof leaks appear at hospital

Recently, ceiling tiles near the Lab entrance and Surgery Suite entrance at WMH are showing three new leaks. The current fund drive of Foundation of Warren Memorial Hospital has attracted over 50 donors for approximately \$7,500. Contributions that are received will go towards the renovation of the most critical sections of the roof that is positioned over the lab, surgery suite and hospital. That goal is \$45,000. Please contact Bob Cockson, President of the Foundation for additional information or to make a contribution.
