

Friend Junior High Students Make Presentations At Tri-County

It was all about the environment at the Public Health Solutions (PHS) District Health Department kick off celebration.

Three groups of Friend Junior High students traveled to Tri-County High School on Thursday to make their CARE presentations.

The students were invited to the event by Kim Plouzek, Emergency Response Coordinator for the PHS.

The eighth graders prepared for the event as part of a class project under earth science teacher Mr. Pfeiffer.

"I thought our kids did a great job. They stood up in front of at least 30 adults and made their power point presentations. It is not easy to be 13 or 14 and do something like this."

"They really represented our community well," said Pfeiffer.

Brady Vossler, Blake Due, Jared Segner and John Clouse based their talk on the environmental benefits of the Conservation Resources Program and farming.

The group that was comprised of Ashley and Brandey Ryan and Clair Stutzman gave their presentation on pollution. Specifically on the affect of trash on air and water in our area.

Kendall Dickinson, Amber Kapperman, Drew Stutzman, Shylo Buresh and Kaitlyn Hoefler spoke on recycling. They talked about recycling paper, plastic, glass and aluminum using the trailer on the east side of town.

After listening to Tri-County and Shickley make their presentations, the students had the opportunity to visit with a representative from the EPA and the other students.
